

DAF100-G2

Advanced Fire Suppression Control and Alarm – All in One

The DAF-100 G2 is your ultimate solution for fire safety in high-risk industries such as mining, forestry, material handling and heavy construction. Combining a fire suppression control system and alarm panel in a single, compact unit, the DAF-100 G2 streamlines installation and boosts reliability, making it the perfect choice for protecting your people, equipment, and business.

Why Choose DAF-100 G2?

1. All-in-One Simplicity

Say goodbye to complex installations! The DAF-100 G2 integrates fire suppression control and alarm functionalities into one sleek unit, saving time and effort. With on-site configuration directly from the keypad—no computers or additional software required—this system is as user-friendly as it is advanced.

2. Reliable Protection You Can Count On

Built for tough environments, the DAF-100 G2 delivers low-maintenance, high-performance fire protection. Its innovative design ensures rapid fire detection, immediate response, and peace of mind, even in the most challenging conditions.

3. Built for High-Risk Industries

From the intense vibrations of construction sites to the rugged conditions of mining and forestry, the DAF-100 G2 is designed to withstand it all. With an IP65 rating and robust construction, it guarantees performance in the harshest environments.
